All disputed lots must be returned intact in the condition received. The following lots may not be returned without prior approval: lots from buyers who have had the opportunity to examine them before the sale; lots described as having defects or faults may not be returned because of faults; and, lots in which the buyer has bid more than double our estimate. No illustrated lot may be returned because of centering, margins, or other factors shown in the illustrations.

Authenticity

13. All lots are sold as genuine, but should any lot be proved otherwise by written opinion of any responsible authority acceptable to us, immediate refund of the full purchase price will be made, provided we are notified in writing within 14 days from date of sale that an opinion is being sought. If claim is not made within this period, no lots are returnable for any reason at any time. We will not be responsible for any charges incurred by the buyer for expertization fees and costs unless the opinion states the item is not genuine, in which case we will pay actual costs up to a maximum of \$100.00. In the event an item is proved "not as described" it is returnable for a full refund. Any lot which has a certificate dated within the last five years is sold in accordance with the certificate and is not returnable for any reason including an opinion obtained in a new certificate after the sale. While we occasionally suggest what grade a coin may receive if certified, we do guarantee that grade (or any other grade) if a coin is submitted for certification.

LOT	U.S. COINS		VALUE	
Colonial Coins				
1	1783 Washington Portrait Piece; Large Military Bust beautiful chocolate brown XF or very nearly so.	EST	160-200	SE
2	Georgius Triumpho Token (1783) VG+. Considered a Washington Piece, the Georgius Triumpho tokens celebrate Washington's victory over the British in the Revolutionary War. Many have commented that the likeness on the coin is much more like that of King George III than it is of George Washington.	EST	125-150	SE
3	1787 Massachusetts Cent Talons in Left Claw "Horned Eagle" variety (so named because of a large die crack coming off the eagle's head attaching to the H in the "Massachusetts" legend). Strong F, attractive uniform brown color on a lovely evenly worn planchet. Small old scratch thru "COM" but inconsequential in terms of the coin's overall aesthetic appeal.	EST	300-400	SE
Half Cents				
4	RARE vintage printing block, two copper rounds w/ reversed images for obverse & reverse of 1796 No Pole half cent, on metal plate on wooden block, measures 54 x 20 x 23mm; only marking is light stamped image on wooden side "26 2" under small bust; likely used for illustration in numismatic book; seldom offered	EST	5,000-6,000	HWC-B
5	1809 "9 over Inverted 9" C-5. This variety is also referred to as "9 over 6". Beautiful brown AU pleasing in every way.	EST	300-370	SE
6	1853 Braided Hair beautiful XF original.	EST	80-100	SE
Large Cents				
7	1794 Liberty Cap S-44 VG Obv; G+ overall. Some small rim bumps but quite pleasing for a Liberty Cap Cent	EST	200-280	SE
8	1796 Liberty Cap S-87 F detail net VG. Nice type coin for a Liberty Cap Cent, dark brown w/ even color. Light obv marks but they do not detract from the coin's overall appearance.	EST	500-700	SE
9	1798 over 7 Draped Bust S-151 net G. Probably VG or better detail but even corrosion reduces the coin's net grade and overall appeal. But the over-date and all legends are clear. Inspection recommended.	EST	150-200	SE
10	1802 Draped Bust Normal Rev S-232 VF. Even dark brown, surfaces a bit rough, still appealing overall especially for a Draped Bust large cent.	EST	240-300	SE
11	1802 Draped Bust S-236 XF+. Surfaces are a bit rough but the coin is a beautiful even dark brown and has great detail. Ideal for type.	EST	500-700	SE
12	1813 Classic Head S-293 Near Star variety F+ detail, net VG+. A bit of roughness on the planchet but even dark brown color and ample detail.	EST	180-230	SE
13	1817 15 Stars N-16 F+ net; even dark brown. Slightly rough on the rev but all characteristics of this interesting variety are present. The origin of the 15-Star obv is unknown. Though it is not scarce in an absolute sense (Bowers estimates 1,250 to 1,500 exist), demand is high because most large cent enthusiasts want one. However most are in low grades.	EST	120-145	SE
14	1818 "Connected Stars" N-10 XF. A common variety due to the Randall Hoard, still a very attractive even brown coin that would be great for a middle-date type. (A large quantity of uncirculated Large Cents mostly bearing the dates 1818 and 1820 was discovered in Georgia in the late 1860s. They were purchased by a man named John S. Randall and sold to the numismatic public for the next two decades. Mint State coins of 1818 N-10 and 1820 N-13 comprised a large part of the hoard. Coins of these two varieties, when in high grade, are generally referred to as Randall Hoard coins.)	EST	125-150	SE
15	1835 "Head of '36" N-14 AU detail. Beautiful on the obv, the rev unfortunately shows light pitting likely from corrosion or other environmental damage. However, the coin has been expertly preserved though the re-coloring on the rev is somewhat incomplete leaving a few coppery colored areas amongst the natural brown.	EST	100-125	SE
16	1837 Medium Letters N-7,8 AU brown. Late die state w/ prominent rev crack through "STATES OF". A few hairlines and spots, still quite appealing.	EST	130-160	SE
17	1839 "Silly Head" N-4 VF+	EST	80-100	SE
18	1840 Large Date N9 VF+ some obv corrosion. Bisecting obv die crack faintly visible but enough to identify the variety.	EST	46-60	SE
19	1845 N-10 XF+ perhaps better. Beautiful even brown color.	EST	75-100	SE

LOT	U.S. COINS		VALUE	
20	1851 N-10 an apparent uncirculated coin but closer inspection suggests that the coin is likely whizzed, though 95% of collectors are unlikely to detect it. A late die state for N-10 resulting is rather mushy detail, still lovely color and smooth surfaces. Inspect for a better idea if this is a coin for your collection.	EST	150-200	SE
21	1855 Braided Hair N-7 AU or very nearly so, beautiful even light brown. Superb for the grade.	EST	80-110	SE
22	1856 Slant 5 N-14 AU brown. Beautiful even color; a few minor marks o/w great detail and lovely surfaces.	EST	110-135	SE
23	(3) Trio of Draped Bust Large Cents incl a couple of 1798 and an 1800. We didn't attempt to attribute these due to the low grades (all AG w/ problems) but a casual view suggests that the 1800 is an S-205 or S-206 (more likely).	EST	100-125	SE
Indian Cents				
24	1859 XF+. A one-year type and beautifully original.	EST	88-110	SE

Seated Quarters				
53	1838 VF or very nearly so. Original and attractive. First year of issue for the Liberty Seated quarter design.	EST	160-200	SE
54	1847-O G+ beautiful original color.	EST	85-110	SE
55	1849-O G+ original. The story of the 1849-O quarter is a fabled one. Not listed on any US Mint account, it's mintage (a mere 16,000 coins), is believed to be lumped in with the 1850-O mintage (which is listed at 396,000.) The reason for this is unknown. Even in low grade, the 49-O is a four-figure coin. Our grade for the present coin is Good-6 w/ beautiful surfaces, even wear, and 100% originality. According to the PCGS website, coins in this condition are in the neighborhood of \$1,500 attesting to its scarcity. 179 have been graded by PCGS and NGC combined, mostly clustered in the AG3 to VG10 range (only 8 are uncirculated, the best being a lone MS64 by NGC.) This offering presents a rare opportunity for the Seated Quarter specialist.	EST	1,200-1,500	SE
56	1853 Arrow & Rays XF. Beautiful light golden-grey.	EST	150-180	SE
57	1861 XF or very nearly so.	EST	60-75	SE
58	1873 No Arrows Closed 3 Proof 58 brightened. This coin has the great detail proofs are known for, and although its has been brightened, it does not have the unsightly hairlines so typical of harshly cleaned coins. The mint changed the weight of the quarter from 6.22 grams to 6.25 grams in 1873. To denote the change, arrows were placed at the date. Coins struck that year under the old weight standard do not have the arrows and are typically far scarcer than those with arrows. But the majority of the proofs struck that year are "No Arrows" coins. The present coin can be verified to be a proof by the small die cracks on the rev shield.	EST	300-400	SE
59	1877-S VF	EST	46-60	SE
60	(4) Diff O-Mint incl 1840-O VG, 1841-O G+, 1843-O (Small O) G, & 1844-O VG. Nice circ coins w/ no issues other than wear.	EST	125-150	SE

82	1859-O XF+ beautifully original but there are a myriad of small scratches on the obv.	EST	75-90	SE
83	1883 Fine but w/ surface imperfections and environmental damage on the rev. By the mid-1870s, the price of silver had fallen low enough to result in millions of previously-hoarded silver coins to flood back to the channels of commerce. This resulted in a virtual cessation of newly-minted quarters and half dollars from 1879 thru 1890. The 1883 half is a scarce one, but with a mintage of 8,000, it is a bit more available than the surrounding issues.	EST	100-140	SE
84	1889 Good. Another scarce issue for the 1880s. (See comments for the previous lot.) Compared to all the other surrounding issues, the mintage of the 1889 is a robust 12,000, nonetheless it is seldom offered.	EST	150-180	SE

92	1921-D ANACS VG8. An evenly worn original perfect for the grade.	EST	270-320	BAG
